

/oldroot nvidia fix

If you are an nvidia user you might have seen an error when shutting down your linux system, here is the fix.

Create and edit **/usr/lib/systemd/system-shutdown/nvidia.shutdown** with next content and make it executable.

```
#!/bin/sh

# remove nvidia modules

/usr/bin/modprobe -r nvidia_drm nvidia_modeset nvidia_uvm && /usr/bin/modprobe -r nvidia
```
